Step 2: Customize the Output Settings

To select the video's output parameters, click the **Setting** icon. You can choose the video format (MP4 or MKV), video quality (Low, Medium, High), the language of audio track and subtitle, the output path, and more. There are three different types of subtitles available on SameMovie:

- Internal subtitles: can save subtitles in multiple languages.
- External subtitles: can save subtitles as independent files, SRT file, so that you can edit them.
- Hardcode subtitles: can be permanently embedded into the video and subtitles are always available.

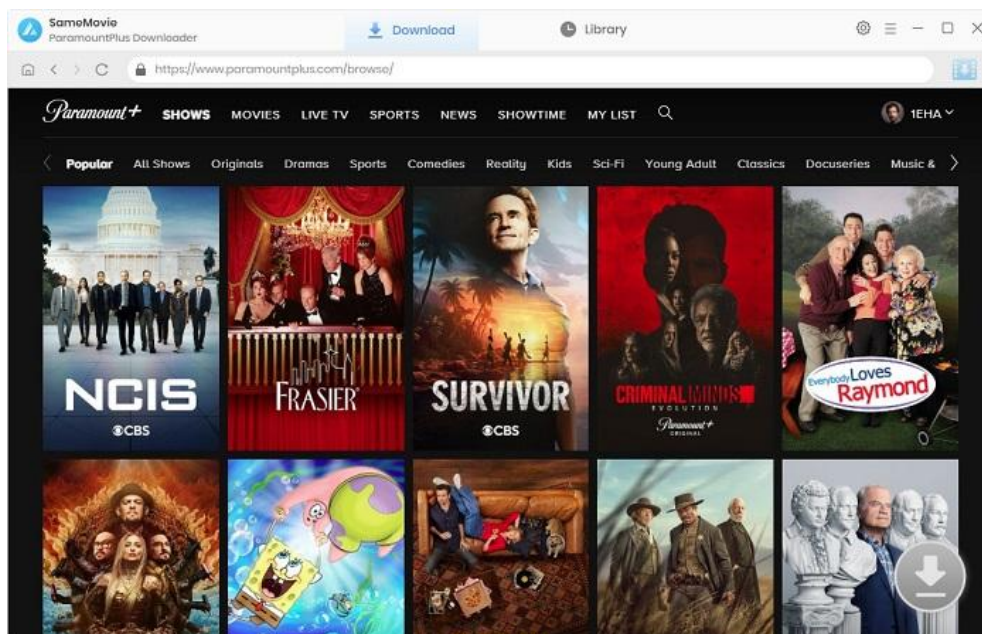

In the "Advanced" tab, it is available to choose H.265 and H.264 video codec option. When selecting the H.265 video code, you can save the video with smaller files when downloading the same definition video. You can also enable hardware acceleration, if available, to improve download performance by using the graphics card.
